IT'S A GRAND DAY

By: Megan

On 9/11/15 Hattie B. Stokes held Grandparents Day in honor of grandparents all around the world. Around 200 grandparents came to visit classrooms and watch the program. At 2:30 all the students went to the gymnasium to watch a Grandparents Day Program held by Mrs. Schoeff and the wonderful students. The choir sang "Make New Friends" and "Frere Jacques". We also made crafts with our Grandparents and had a snack. I think that it should be Grandparent's Day everyday, because grandparents are awesome.

THE WOOLERY WORD: ON PECULIAR CHILDREN

by: Brody

We are reading Miss Peregrines Home For Peculiar Children. The author is Ransom Riggs and yes that is his real name trust me. This story takes place in the 1940's and there's a boy named Abe Portman and he was born in Germany. The Nazis were taking over so Abe had to leave his family and go to this island in Cairnholm, Wales. There's a big old mansion and that's where the orphanage is. Past a bog in the woods. The owner is Miss Peregrine and she is in her 30's. All the children there have a magical unique power. Because of this, the parents probably didn't want them or they were in danger. Abe gets killed from the Nazis. He was killed mysteriously. Abe's grandson Jacob is the main character in the story now. Jacob is 16 years old and when he was little, his grandpa told him a bunch of stories of the peculiar children.

I think that this an interesting story and it is very peculiar and suspicious. I would recommend this book, because it uses a lot of great photographs also that are creepy and strange. It has some strong language, but our teacher censors it when she reads. You could do that for your kids too.

Ms. G is going to meet Ransom Riggs next Wednesday. She is going to share letters with him that we wrote. I think that she will find him very peculiar.

GETTIN' GRABBY by: Dilynn

The Amazing Room 503, has three Hermit Crabs. Their names are, Jacques Cousteau, Marie Antoinette, and Eddie. They are the little masterpieces of our room. I love them because they are very quiet and interesting. We have the Classroom Pet Managers that take care of our lovely pets.

There is more than 600 species of hermit crabs in the world, but only a few can be pets. They are called "Hermit Crabs" because each one carries its shelter with him. Hermit Crabs can live up to 15 years! 25 years is not uncommon, some have lived up to 40 years! Everyone loves them. Just because they are tiny little animals and they entertain the whole class!

IN THE CLUB

by: Jesse

Clubs and recess are very fun and every one can agree with me. Now, at clubs we have a different things we do. Like there's Kick Ball, Fit Club, Science Club and Art Club. In Science Club you get to do science projects like a bucket going up and down with a wheel and axel. Also, we did this thing were you close your eyes and plug your nose and eat a jelly bean and guess the flavor of the jelly bean. Good news, no Skunk Spray flavor.

Art Club in Art club there's a thing Pirates Revenge and you draw pictures for the art museum I think and you do art. Next, is Fit Club you do fit stuff and exercise. Next, Kick Ball Club. Well, if you've played kick ball that's what it is. You kick a ball.

Ok now there is Recess. There are two different places we can have it. There's the blacktop where kickball is and there is the equipment. There are slides and ladders and monkey bars. Its' really fun.

See you next recess!

ALL ABOUT CANVAS

by: Kyla

We are doing something new this year in 5th grade, and it's fun! The name of it is Canvas. Canvas is like an online school, except you type things instead of write things!

In Canvas, we do a bunch of different things like writing, testing, math, and so on!

In writing we can do almost anything the teacher gives us! We did 9/11 things, we had to write 3 days' worth of journals, where we were stranded on an Island, and we did tests on Language Arts!

In testing, all we had to do was type our answers that we needed to type, and click on our answers for icons we could click on!

In math we haven't done much, but we might soon! All I know is that it will be fun, because it's on something most of us like... COMPUTERS!

More things about Canvas is that we can communicate with the teacher online. If your teacher made you an account for Canvas, you can talk to him/her by creating a conference!

I like Canvas because it is easier than writing on paper. The assignments are more interactive and fun. If you like to do things on computers, this is for you!
